

Smart move

Start each day with the very best. Incorporating the latest in state-of-the-art technology and exceptional revolutionary innovation, the new SmartTouch-XL from Philips is the best shaver from the world's No1

As we all know, time is precious – especially in the mornings. With the struggle to get yourself up, to repair the previous night's damage to your system, to get the kids ready or just to leave the house on time, mornings can be a minefield of lost seconds. Thankfully, the SmartTouch-XL from Philips is designed to save time and help you through the morning, making those waking hours go a lot more smoothly.

SmartTouch-XL saves the day thanks to its Speed-XL shaving heads – featuring a triple track system that provides 50% more shaving surface than any other rotary shaver. Like the suspension on your car, SmartTouch features a new suspension cushioning system, with a tri-pivoting action, allowing the entire shaving head to flex and follow every contour of your face and neck. You don't have to waste precious moments cleaning either, because the top-of-the-range comes with a JetClean system that both cleans and charges the shaver, ensuring peak performance every day. So, Philips SmartTouch-XL ensures at least one thing will go your way every morning. Prices: £140 - £220.

Win one of five SmartTouch-XL*

The Philishave SmartTouch-XL will give you a faster, cleaner, closer shave so that you can enjoy the best result possible – and Men's Health can make it happen for you!
