Braun's innovative new shaver might just be the finest grooming accessory around

Gentlemen, the dark ages are behind us. Why? Because the Braun Pulsonic has melded sleek design with cutting-edge technology to create a beautifully precise grooming tool. Welcome to modernity.

The Pulsonic is the first shaver to contain a Sonic Motor, which produces tiny vibrations through the shaver head, while the SensoFlex system gives the shaver head incredible pivot. The upshot? Hairs are gently raised away from the face allowing you to get to hard-to-reach areas without difficulty.

Scissor-like Cross Cutting Technology gives a fast, smooth shave, while the Clean & Renew system makes the Pulsonic incredibly easy to clean. The price tag puts the Pulsonic in the premium bracket but with this sort of technology, it's not a cost – it's an investment in your face's future.

To win a Pulsonic, worth £250, go to menshealth.co.uk/pulsonic. For more information go to braun.com/uk
