WHO IS HITMAN?

Hitman is Agent 47. His name stems from the last two numbers on the barcode tattooed on his neck. His reputation as a fearless and ruthless assassin stems from years of successful "wet work" on behalf of The Agency, a faceless organisation that has tasked him with deadly missions all over the world.

Stylishly

EXECUTED

IT'S BEEN A GREAT YEAR FOR ACTION MOVIES, BUT WITH *HITMAN*, THE BEST HAS DEFINITELY BEEN SAVED TILL LAST

Starring Timothy Olyphant (*Die Hard 4.0*, *Deadwood*) as the Hitman AKA Agent 47, *Hitman* is a hard-hitting, stylised action thriller about a relentless assassin. When Agent 47 is double-crossed by his paymaster, the hunter becomes the hunted and he must uncover the truth about the sinister agency attempting to set him up. Aided by a beautiful Russian woman, who is unwittingly drawn into his world, Agent 47 is pursued across the globe by forces legal, illegal and all shades in-between, Agent 47 is pushed to the very limits of his dark expertise.

CHOOSE YOUR WEAPON

The most powerful weapon in Agent 47's armoury is his ice-cool nerve, but this alone cannot help him complete his assignments. At close quarters, he is expert in the use of deadly poisons, preferring the plant toxin Ricin Cytotoxin since it kills in minutes and leaves no trace. From distance, Agent 47 uses a .50 calibre Barrett sniper rifle: accurate to 1.5 miles and with bullets that can pierce armour plating. His signature guns of choice are a pair of .45 silenced pistols - his victims never even hear the shot. And for maximum impact, Agent 47 also boasts the military plastic explosive C-4 in his repertoire. Ruthless, but always stylishly executed.
