

WHAT LIES BENEATH

Style alone will take you so far, but marry it with high performance and you have a world-beating combination. Here's how you'll back up your bold good looks with the superb technical capability of the new Mazda RX-8 R3

PUT YOUR FOOT DOWN

Of course, high technology is not unique to the Mazda RX-8 R3. Across the whole range, Mazda deserves its reputation as Britain's favourite sports car brand. Built for those who love driving and truly know their cars, the Mazda "Zoom-Zoom" life should speak to the cultured racer within you. Great looks with a deftness of touch and the performance technology to take your driving to the next level? Sounds good to us.

MH PROMOTION

The new Mazda RX-8 R3 excels with acclaimed dynamic handling to back up its aggressive good looks. It's the only production car in the world that uses the multi award-winning RENESIS rotary engine. With over 40 years of engineering heritage, it gives a unique motoring experience, characterised by smooth and refined power delivery. As a four-door sports coupe, the new Mazda RX-8 R3 couples an exhilarating drive with practical usability. A rear-wheel drive chassis gives you outstanding sporting performance, while 50:50 weight distribution means agility and stability are key features of the unique ride. Half-leather Recaro sports seats and premium specification make it a truly brilliant sporting experience to drive. Want something to listen to? A Bose® 6-CD auto-changer is standard, although there's always that rotary engine screaming to a 9,000rpm red line to take your fancy.

Instant upgrade:
the new Mazda RX-8 R3 builds on impressive brand heritage, with improvements in every area, from style and comfort to performance and functionality
