

# THE ADVENTURES OF

# Orbit Complete Man

Plaque attacks your teeth throughout the day – if you could only see the damage it does, then you'd chew sugar-free Orbit Complete, containing Xylitol to help fight off plaque. Just ask Orbit Complete Man...

ENAMEL CITY, THE DAY BEFORE TOMORROW...

The city is in crisis, as a perma-plaque descends

All over town, teeth are starting to decay

High above Enamel City, Dr Plaque and his henchmen look on, as their yellow-toothed enemies start to crumble

"Their defences are weak! As my plaque attacks their teeth throughout the day, their mouths will rot away to nothing! Ha ha ha!"

Suddenly: "It's Orbit Complete Man! And it looks like he's got Xylitol!"

"God, he's looking healthy clean and fresh! And check out those pants!"

"Why didn't you call me sooner? Don't you people know that my Orbit Complete contains Xylitol! Dr Plaque hasn't got a chance!"

POWW!!

ARRH!!

"How can we ever thank you, Orbit Complete Man?"

"Just use Orbit Complete to help keep your teeth healthy, clean and fresh throughout the day. Think you can do that, toots!"

**Orbit Complete** Even outside Enamel City, Orbit Complete contains Xylitol, which makes it an instant way to help fend off plaque during the day, as well as keeping your breath fresh and your mouth clean. The new tab packages contain 14 easy-to-use, individually wrapped tabs, which are a convenient way to stop your mouth from feeling like Dr Plaque's leftover lab rats have spent the night in it. Not only is the active ingredient Xylitol clinically proven to fight plaque, Orbit Complete also tastes rather splendid. Pick a packet up for 59p – it's a lot cheaper than hiring a blue-masked dentist in tights!
