

THE ADVENTURES OF *Orbit Complete Man*

If you could see the attack that your teeth come under throughout the day, you'd chew Orbit Complete sugar-free gum with Xylitol, which helps to fight plaque. And in Enamel City, there's one man keeping the message alive...
Orbit Complete Man

Dr Plaque and The Red Wine Swine are on the rampage in Enamel City

As plaque begins to form, the citizens panic

Suddenly...

"Against Orbit Complete Man's Xylitol defence powers, plaque doesn't stand a chance!"

"Thanks, Orbit Complete Man!"

"No problem honey. You keep that pearly grin fresh for me..."

Orbit Complete contains Xylitol, which is clinically proven to help fight plaque. Chewing throughout the day will help fight off plaque attacks from dastardly food villains such as red wine and coffee, as well as malodorous baddies like garlic. All that supercharged protection will help keep your mouth healthy, clean and fresh all day long. The new Orbit Complete packs contain 14 individually wrapped tabs, making them the perfect defence against any fiendish attack that hits your mouth.
