

# The best TV in the World Cup

Your enjoyment of the Rugby World Cup requires a top-drawer television. Witness the Toshiba REGZA C Series...

**T**he onset of a sports tournament requires the armchair fan to do three simple things: clear his diary, fill his fridge and sort his telly out. In the third and perhaps most important of those factors, Toshiba are lending a mighty helping hand in the shape of their fantastic REGZA C Series LCD TVs.

Available in three sizes (32, 37 and 42 inches) and HD Ready, these splendidly affordable TVs come with a built-in Freeview

tuner, two HDMI sockets for your other hi-def kit (games consoles, pay TV, next-gen DVD) and built-in SRS WOW amplifiers that deliver a rich, room-filling sound.

Of course, the most important factor for a TV is its picture. Thanks to Toshiba's Active Vision LCD picture processing, the REGZA C Series provides a superb viewing experience – a clear and colour-perfect image that enhances your enjoyment of the on the field action.

You also want your TV to look good when it's switched off and the REGZA C Series' stylish matt black finish takes care of that. In fact, packed as it is with excellent features, a Toshiba REGZA C Series LCD TV is an instant and complete solution to your TV upgrade problems. The only thing it doesn't provide is guaranteed home nation success...
