

# BACK IN THE GAME

If your joints aren't quite the match for the battering you're keen to give them, Elastoplast® Sport supports are what you need. Here's how their support and injury prevention can help keep you in peak condition

Whether you're being blasted around the rugby field, or challenging your ankles to keep up with your marathon pace, Elastoplast Sport supports are vital to protecting vulnerable joints and getting the most out of your performance. Using skin-friendly neoprene technology – the same fabric used in wetsuits – the Elastoplast Sport range supports joints and muscles more firmly than elasticated supports, keeping them warm for increased circulation, while providing comfort on the pitch. One size fits all.

Elastoplast Sport Adjustable Knee Support, RRP £17.55. Adjustable Wrist Support, RRP £13.39. Adjustable Ankle Support, RRP £15.45. Available in Boots, Tesco and other leading retailers
